Subject: Administrative Framework for Stormwater in the ROD- summary of 6/16 meeting
Date: 06/16/2006 04:36 PM
Attachments: [Administrative Framework.doc](#)

We had an excellent discussion on Thursday although it was limited to DEQ and BES. Here is a quick summary of deliverables:

1. EPA/BES/DEQ- Review the "Administrative Framework" document contained in Karen's 6/8 e-mail and reattached here. Please send Karen comments and be prepared to come to the Thursday 6/29 meeting to resolve & finalize this document. Once finalized, we'll plan to share the documents with the LWG & perhaps other stakeholders.

<<Administrative Framework.doc>>

2 Karen T- Continue working on the "Project Map" document & flesh it out to include all PH SW drainage basins (not just City systems) & to include a sense of time (Timeline?). Incorporate in diagram considerations of a path forward on characterizing SW loading, and integration between upland and Inwater. Needs to identify timelines, and potential simplifying assumptions. Check in with Dawn and I about details on this.

3) EPA/BES- Please complete your reviews of Jim's 5/06 "Steps in PH SW Evaluation", before the meeting.

4) EPA/BES/DEQ- Consider convening EPA/LWG mtg to discuss integration of upland Stormwater and in-water RI.

5) BES- Continue working on generic model designed to evaluate the relative importance of Stormwater contribution to the harbor.

Subject: Administrative Framework for Stormwater in the ROD

At our last meeting we talked about needed to flesh out the concept of the "administrative framework" we were discussing. Here is something to get the conversation started.

Our next meeting is scheduled for next **Thursday, June 15, 1:00 - 3:00, Conf Room C at NWR** - and we can dig in to it then. Well, you folks can - I'll be riding my bike somewhere in southern mississippi, so I'm hoping someone will take good notes!

Karen
